

## *Education*

### EARLY DETECTION IS THE KEY

Bahamians have one of the highest statistics of breast cancer in the world. #5 on the list, they have a breast cancer rate of 98.9%.

Researchers' evidence suggests that women in The Bahamas are carriers of two kinds of breast cancer genes. Nearly 24% of the women carry the genes, BRCA1 and BRCA2, making The Bahamas, a country with the highest prevalence of this genetic mutation.

Health officials estimate 300-500 new cases of breast cancer each year, and 48% of the women diagnosed with breast cancer in The Bahamas were under the age of 50.

The average age of diagnosis in The Bahamas is 42, while in the United States, it is 62. 44% of Bahamian women with breast cancer had Stage 3 or Stage 4 of this disease by the time they were diagnosed. This means that these cancer victims did not receive the help they needed through early detection screening.

This year give the gift of LIFE!

When it comes to fighting breast Cancer, it takes a village

I'm Every Woman (IEW) is looking for people to help save a life, one person at a time!

Eleuthera, Bahamas is located 73 miles from the coast of Nassau, Bahamas.

Eleuthera currently does not have access to give their residents mammograms and ultrasounds. Therefore they have to travel to the near by island of Nassau.

## BREAST CANCER AWARENESS

365 DAYS OF THE YEAR!

*from Eleuthera to Nassau*

The day would consist of an early flight from Eleuthera to Nassau. A bus ride to and from the clinic to get the needed mammograms and ultrasounds testing, lunch and a facility tour.

This is an opportunity to celebrate survivorship, remember those we have lost and make a difference in the fight against breast cancer.

It raises awareness about health issues that affect thousands of women in the Bahamas and will help make a difference in how breast cancer is understood, diagnosed and treated.

IEW's future goal to purchase and/or have a donated mobile mammography unit that will provide aide to the island of Eleuthera as well as other smaller islands in the surrounding area of the Bahamas.

Become a Sponsor Today!

Your sponsorship helps the women of the Bahamas become informed about their bodies and detect Breast Cancer early

All Levels of Sponsorship provide  
Round trip Airfare - Transportation to and from  
Mammogram and Ultrasound Testing
